ABOUT HOUZEKO

When beauty meets sustainability

houZEKO is our first design, our first Tiny House on wheels. We wanted to combine **innovation**, **sustainability** and **beauty** without losing indoor space to enrich your experience.

#1 Our goal is to answer to your needs, whether they are specifics are not. Innovation is the best part of it as we constantly think about something new, to create or improve.

#2 The project has been created from a sustainable perspective. Our team work with local partners and natural materials from Slovenia. Every step of the construction matters to reach a qualitative result.

"Tiny but Sexy, Cozy and Eco!"

The backbone and structure

houZEKO is made from spruce wood. A typical tree from Central and Eastern Europe. From extraction till its usage, wood is highly environmentally performant and has many benefits.

The rooftop

Two-sided rooftop to let the natural light enter in. Made from white gum, it is recommended for flat and sloped roof. When it is sunny, the white color avoids the sun heat. In contrary, when it is rainy, the roof lowers the rain sound.

The wooden windows

We intentionally chose wooden windows thanks to their durability and energy efficiency. Despite their aesthetic, their strength prevents weather damages. You won't need to think about it twice as they are up to 50 years !

THE TRAILER

houzEKO trailer is the single piece made out of Slovenia. It is very important for us to have a high-quality trailer as it will carry a Tiny House up to **3,5t**.

The trailer is the pillar, the essence of this special habitat. To build our Tiny House, we decided to work with a partner from Netherlands, a qualitative and trusted choice.

Location

Since houzEKO is designed as a trailer, you can park it almost everywhere. If you want to find a permanent place, it is also possible. However, I would suggest you to check with the city hall since every country runs its own rules.

Driving licence

Last but not least, a Tiny House is registered as a vehicle! You do not need a special driving licence. Nevertheless, better to take precautions and read the local legislation. Although it seems easy to track a Tiny House, I would suggest you to think about a higher engine vehicle!

THE BENEFITS

SEXY AND MODERN

Tiny but sexy, cozy and modern. All designs are possible from toilet, shower, kitchen, living room and sleeping loft. Your choice is wide.

COST EFFICIENT

Well insulated, easy and quick to heat or cool it. An ecological composting toilet and a water effective loop shower can be at your disposition. No worries about water bills anymore !

FLEXIBLE LIFESTYLE

Do not forget the main point : a Tiny House on wheels will carry you wherever you wish. Destinations...1,2,3 GO !

JOKER!

The best for the end... houZEKO can be an **off-grid living unit**. Meaning that you can store water and produce your own electricity. This option gives you many benefits if you wish to live independently!

DIMENSIONS

The dimensions of a Tiny House are essential. We do not want to go over the limit weight (3.5t) but we want to save space indoor. Our goal is to design the house with your involvement, with your expressed needs, so we can save space in the right place!
